Accessibility

Standard	WCAG 2.1 Level AA
Tested	October 16, 2026
Site	spoonbill.dev

Spoonbill is built to WCAG 2.1 Level AA and Section 508: the standard the U.S. Department of Justice's ADA Title II rule sets for city and county web content, including content a city provides through a vendor. Every public page passes all 35 automated accessibility checks in Google Lighthouse and scores 100, on phone and desktop.

Google Lighthouse accessibility score on every public page, phone and desktop

WHAT IT MEETS

WHAT REVIEWERS CHECK	WCAG CRITERION	SPOONBILL
Colour contrast	1.4.3 Contrast (Minimum)	Every word on the page is at least 4.5:1 against its background; body text is 15.9:1.
Links that do not rely on colour	1.4.1 Use of Color	Links inside sentences are underlined, not just coloured.
Text alternatives	1.1.1 Non-text Content	Every image carries alternative text.
Names for buttons, links and fields	4.1.2 Name, Role, Value	Every control tells a screen reader what it is and what it does; all 12 ARIA checks pass.
Spoken name matches the label	2.5.3 Label in Name	Voice-control users can say what they see on a button.
Labelled forms	3.3.2 Labels or Instructions; 1.3.5 Identify Input Purpose	Every field and menu has a label; address fields declare their purpose to autofill.
Page structure	1.3.1 Info and Relationships	Headings in order; lists and tables marked up as lists and tables.
Skip to the content	2.4.1 Bypass Blocks	Each page marks its main content, so assistive technology can jump past the menu.
Page titles and language	2.4.2 Page Titled; 3.1.1 Language of Page	Every page has a title naming it and declares its language.
Zoom	1.4.4 Resize Text	Pinch-to-zoom is never switched off.
Touch targets	2.5.8 Target Size (WCAG 2.2)	Every control is at least 24 by 24 pixels, a WCAG 2.2 criterion beyond 2.1.
Motion	2.3.3 Animation from Interactions (AAA)	Animations stop when the device asks for reduced motion.

FOR YOUR ADA TITLE II REVIEW

- Under the DOJ's current schedule, cities of 50,000 or more must meet WCAG 2.1 AA by April 26, 2027; smaller cities and special districts by April 26, 2028.
- Our Accessibility Conformance Report (VPAT 2.5, WCAG edition) covers the whole product: spoonbill.dev/vpat-2026-10.pdf. We also answer procurement questionnaires.

HOW IT WAS TESTED

- Google Lighthouse 13.5 on the live site: home, pricing, quote and about, phone and desktop profiles.
- Automated checks cover part of WCAG, not all of it. Found a barrier? Tell us at hello@spoonbill.dev.
